## SUMMARY

Nothing has triggered my interest more than Web Development. To create wonderful web projects and spread my knowledge and ideas to the world. Web Development is a never-ending learning process. It's like the more you create, the more yo'll learn. In the 21st century, Web Development will be the hottest field to work in as it is contributing a lot to digitalization and networking. I want to innovate new ideas and projects and give my best to the company.

Besides, I am very passionate to study Artificial Intelligence, Robotics, and Astronomy and combine their knowledge to make robots and make them artificially intelligent to respond to the satellites and also to detect various activities out there in space. So I want to get a job and apply my skills to get some real hands-on experience.

## KEY SKILLS

Web Development   MERN   Pandas   Python   HTML   CSS   JavaScript   Tableau   MongoDB

## EDUCATION

**Senior Secondary Higher Education**                                   Apr '19 - Jul '20
**Saint Xavier's Convent School**                                              Lucknow, IN

*Secondary Education*

## INTERNSHIPS

**Full Stack Web Development Internship**                        Sep '20 - Dec '20

*From Edureka*
Trained to create website with MERN Stack

**Summer Training Internship in Python**                         Jul '20 - Aug '20

*From Scimox*
Trained to do Data Analysis with Pandas

## KEY PROJECTS

**PROJECT 1: An E-Commerce Website**                            Nov '20 - Dec '20

**Brief:** Created an online shopping website from which users can purchase various items online from the comfort of their homes. In this website, I have used MERN technology, i.e. MongoDB as a database, React for Frontend, NodeJS with express in Backend. The website created was fully responsive with the help of the React-bootstrap package.

**PROJECT 2: Online Food Ordering Website**                  Sep '20 - Dec '20

**Brief:** Created an online food ordering website from which users can order food online from the comfort of their homes. On this website, I have used CommerceJS as a database and backend. For Frontend, I have used React and provided styling with the Material-UI package from NPM because of which, the website is fully responsive.

## Certifications

**Full Stack Web Developer Super Intern Certificate**    Sep '20 - Dec '20

*From Edureka*

**Summer Training Internship in Python**                         Jul '20 - Aug '20

*From Scimox*
